

McNAMARA • SALVIA
STRUCTURAL ENGINEERS

ACADEMIC

McNamara • Salvia has completed over 80 academic related structures with particular focus on colleges and universities. These structures include a range of dormitories, research facilities, classroom buildings, and libraries. These structures require durability in order to withstand decades of use. They often also require flexibility in usage and cater to future possibilities.

The McNamara • Salvia team provides a value to academic projects creating safe, long-lasting structures conforming to grants and tight budgets. Our goal is to minimize the structure cost and maximize the budget for finishes, furnishings, and equipment.
