

McNamara · Salvia has designed a variety of significant high-rise office structures using combinations of both concrete and structural steel materials. With over 100 office projects in our portfolio, the firm also specializes in office headquarter buildings for world class corporations such as Liberty Mutual, UNUM, BASF, Adobe, Mathworks, Staples, Reebok, and Bose.

Office building structures are typically large and repetitive, so choosing an economical structural system is imperative. A low-rise suburban office campus often has the same amount of floor area as a downtown high-rise. McNamara · Salvia has the experience and expertise to bring value and quality to any type of office project.
